## PROFILE

As a Frontend Developer, I enhance user experience through web apps built with React, Next.js, and TypeScript.

I'm committed to writing maintainable code that follows best practices and standards. I design and implement modular components, ensuring a robust frontend architecture that supports integration and scalability. I also collaborate with a cross-functional scrum team, where I contribute to the ideation, planning, testing, and deployment of our projects. I enjoy learning from my peers and sharing my knowledge, as well as exploring new technologies and methodologies that can help us improve our work.

I'm happily married with two kids and have a passion for travel and discovering new cultures, including treks in Nepal and trips across the US and Mexico. In my free time, I enjoy frontend development, swimming and quality moments with loved ones and our dog, Joey.
